Mixer

## DRY AND WET FEEDING OF PIGS WEIGHING FROM 7 KG TO SLAUGHTER WEIGHT

The Domino Mixer dispenses feed and water when wanted. A nipple placed in the trough allows the pigs to alternate between feed and water or to mix feed and water. The eating plate is located under the feed hopper from which feed can be taken directly, or the plate can be activated so that feed falls into the trough. Ideal for more greasy feed mixes which tend to bridge.

The Domino Mixer is also noted for the following:

Strong materials, PE plastics and stainless steel
Stainless steel section reinforced edges
No sharp edges that can harm the animals
Easy to clean
Supplied fully assembled and ready for installation
Multiple feed amount settings ensuring minimum feed waste
